

Softhouse Project

Softhouse Project

Goal

The goal of the project is to design and produce a platform for control and surveillance system using AI and 5G.

Tasks

- Task1
- Task2
- Task3

Requirements

- Requirement 1
- Requirement 2

Scope

- Area: Something.
- Focus: Something
- Sources and projects: Something
- Testing and Integration: Something
- Contribution: Open source.

Infrastructure needs

- Something.

Dependencies

- *Identify similar projects is underway or being proposed in Nordix or upstream projects*
- *Identify any specific development be staged with respect to the upstream project and releases.*

Product

The current repository for this project along with further documentation can be found at link to github.
