

Nordix Open Lab

Infrastructure

All good foundations run on a solid infrastructure. The Nordix foundation is no different and our infrastructure page is the place to come to see how we run our labs, what is going on and how we support the open source code and activity in Nordix.

Quick navigation

When you create new pages in this space, they'll appear here automatically.

- [Infra Access](#)
- [How-To Articles](#)
- [Infra Administration](#)
- [Security](#)
- [Research and Investigation](#)
- [Nordix CI/CD](#)
- [Upgrades](#)

Roadmap

It's early days for us, our roadmap is long an windy and we are yet to set a structure to how we get everything done. There is a [Jira backlog](#) where you can see things to do and add new items, like "connect my lab!" to the backlog. Best way to get involved is to get involved, the team would be happy to hear from you. discuss@lists.nordix.org
